### GENERAL SUMMARY

The IC&E (Instrumentation, Controls and Electrical) Technician is responsible for the maintenance and repair of all instruments, controls, and electrical systems at the plant.

### PRIMARY DUTIES AND RESPONSIBILITIES

- Inspects, tests, adjusts and maintains all instruments, control and electrical systems to ensure equipment is in good working condition
- Performs preventative maintenance duties on all major equipment and systems as well as emergency back-up systems
- Works on plant distributed control system, including troubleshooting and configuration changes.
- Maintains complete equipment files, logs and drawings for all designated equipment.
- Submits requisitions for spare parts and assists in managing inventory. Helps to forecast needs for parts and equipment, particularly during planned maintenance outages.
- Participates in administrative maintenance of the plant operating manuals, technical references, diagrams and maintenance records.
- Inspects, tests, repairs, replaces as necessary all types of motors, generators, transformers, switches, control equipment, wiring, electrical signal and communications systems and storage batteries.
- Maintains emissions monitoring equipment as required by air permits
- Organizes technical data and completes appropriate records and reports
- Analyzes and interprets a wide variety of technical test data
- Assist with plant shutdown and start-up including the turbine and all auxiliary equipment
- Maintains a functional knowledge of the operations software and hardware
- Works closely with all team members to ensure each task is completed in a safe and efficient manner in compliance with all regulatory requirements
- Assists in the control of quality and productivity while maintaining good housekeeping standards on a continual basis
- Attends safety meetings and training programs and participates in plant safety programs as required.
- Required to work overtime as necessary in the form of additional hours per day and additional days per week as dictated by plant operations including but not limited to call-ins and outages both forced and planned.

SCOPE OF RESPONSIBILITY AND WORKING RELATIONSHIPS

The IC&E Technician is an individual contributor with no direct reports. The position reports directly to the Maintenance Manager and may take direction from other members of the plant management and supervisory teams.

The IC&E Technician collaborates with members of the operations and maintenance team to troubleshoot during plant upsets, as well as, on planned maintenance efforts aimed at improving overall plant performance and efficiencies.

JOB QUALIFICATIONS

- Minimum High School diploma or equivalent work experience. Related college courses or relevant B.S. Degree preferred.
- Five years or more of related power plant experience including instrumentation systems, preferably P.L.C., ABB and Bailey DCS
- Must have a detailed understanding of the operation of power plant IC&E systems, including instrumentation, controls, electrical and mechanical skills
- Proficiency reading and interpreting logic diagrams, mechanical and electrical drawings, and technical manuals
- Strong analytical, problem solving and critical thinking skills
- Solid use of computer systems and software including the use of computer diagnostic applications and programs
- Effective written and verbal communication skills, as well as, the ability to read and write clearly
- Proven ability to collaborate and work with others
- Must have the ability to follow and enforce safety, environmental and compliance policies
- Must have the ability to work independently and with limited supervision and direction
- Must be able to timely report to the plant with limited notice for call-outs, emergencies and/or shutdowns based on plant operational needs

PHYSICAL REQUIREMENTS AND WORKING CONDITIONS

- IC&E Technicians must be able to work in extreme temperatures inside and outside as the work may require exposure to heat, cold, wind, and rain
